Discovering new ways to unpack long ignored descriptions!

Content

Year in Review for the Enslaved Description Group

1. **Looking back** – beginnings
2. **Formulating name entries** – based on slaveryCode
3. **Conceptual Category Types** – descriptions of CPF entities are being revised and expanded
 - a. **Occupation**
 - Slavery Era Occupations
 - Domains - used as tool
 - b. **Slavery Era Demographic Group** – new concept category type
 - c. **Ethnic Group** – proposed concept category type
4. **Editorial rules for controlled vocabularies**
– a draft for Standards and Editorial Policy Group review

Let's
pause for a
moment . . .

- . . . last year – I spoke about difficulties in conducting African American research:
- Basic Enslaved Person entries in databases are inconsistent
 - Information taken from databases is often dispersed causing loss of relationships to associated facts
 - Enslaved Person research & genealogy is more complex than Non-Enslaved Person research & genealogy
 - Notes and clues (for further research) are difficult to organize
 - Enslaved person research is often indirect . . . through various owners, records, locations, occupations, happenstances, etc.
 - Complexity makes it difficult to keep the information straight and in focus
 - Enslaved person researchers may not know where to look until clue seen
 - Enslaved person research does not fit the norms for non-enslaved person research
 - New TOOLS are needed!!!!!!!!!!!! . . . **could it be slaveryCode?**

Remember last year?

We reviewed problems with
**enslaved person identity and
description!**

Hitting that **“brick wall”** may look
like this for enslaved person
researchers! . . . Very foggy!

How do you know which enslaved
“Allen” is yours?

It is not easy to remove bricks!

Question:

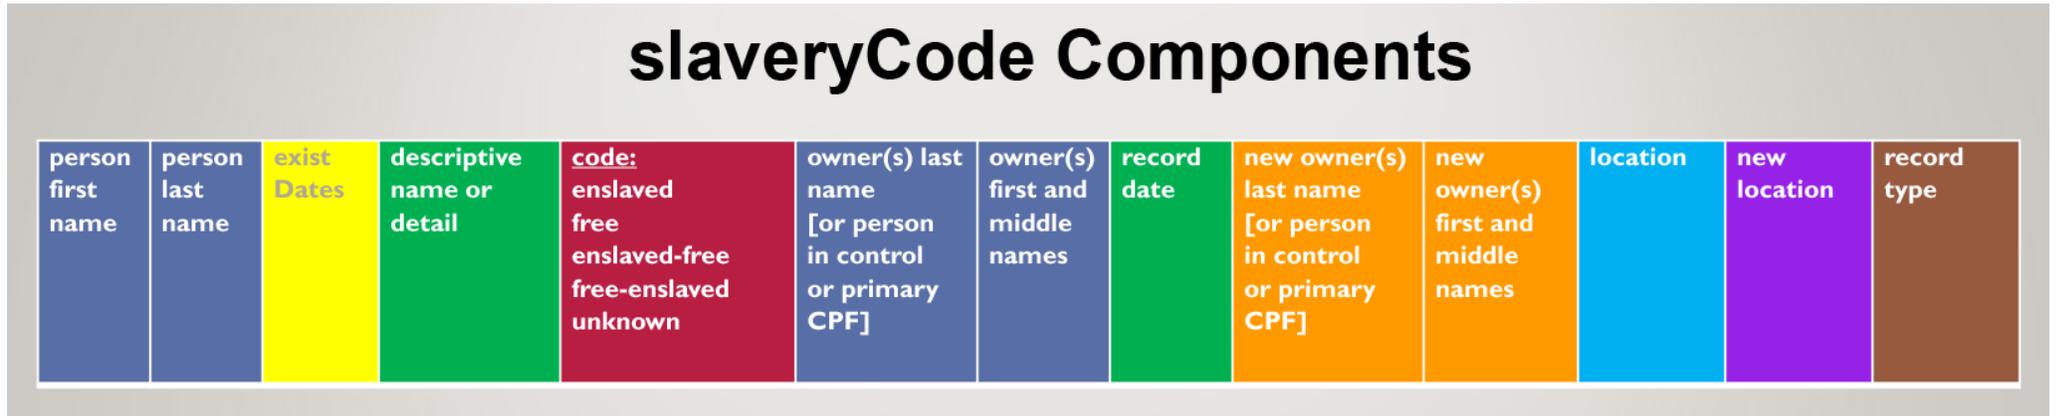

What do non-enslaved persons
have that most facilitates their
research . . . **a last name!!!!**

Quick review:

*Shorthand data that stays with a specific name entry from a specific record

Specificity
Visibility
Portability

How can we connect archival records of the enslaved without including all of this descriptive data?

What do you know about Allen Battle from this?

Allen (overseer) **enslaved**BattleJamesS1854BattleKempP(Mrs.)_WalnutCreekPlantation-EdgecombeCoNC_Book

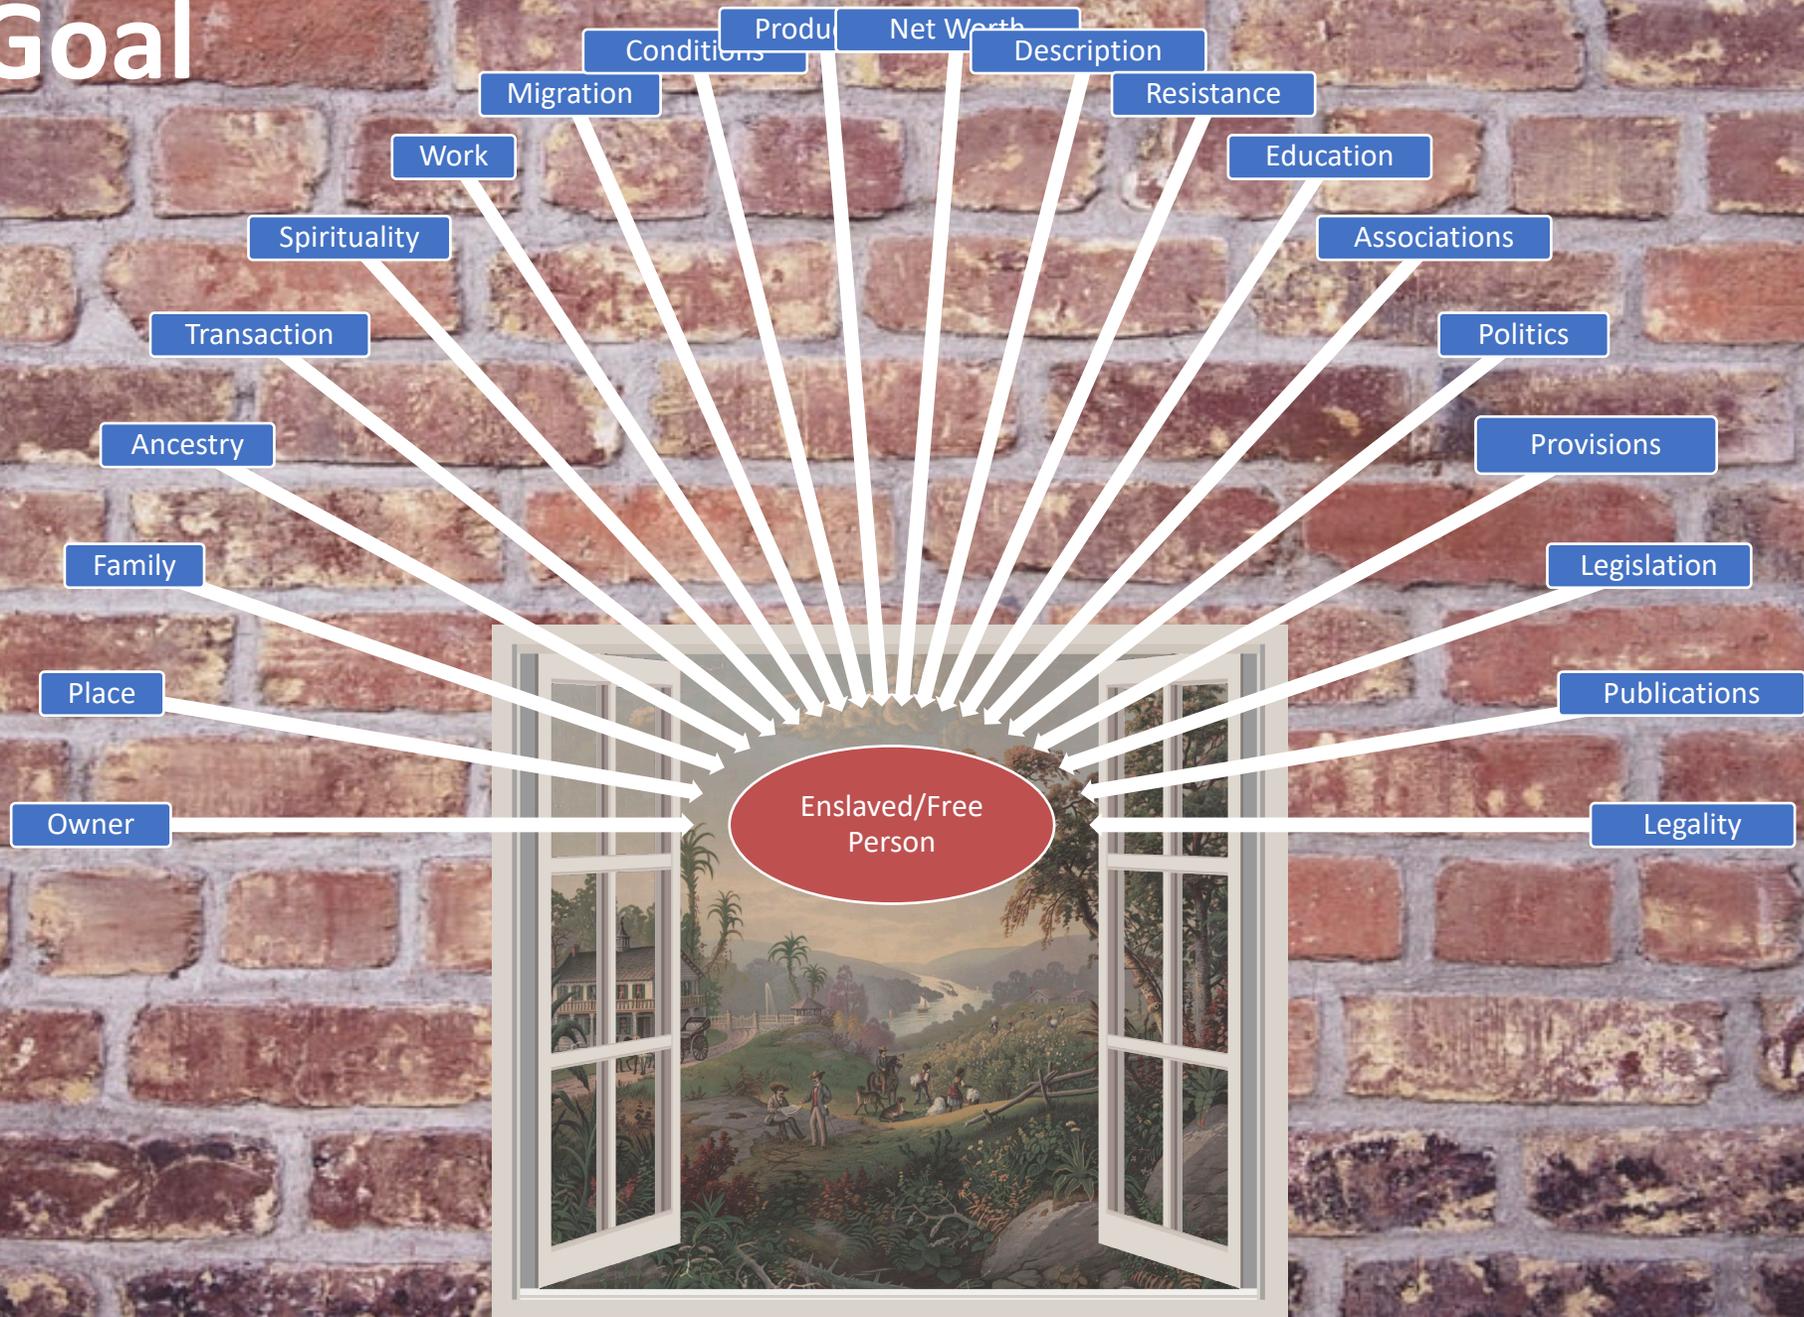

Allen Battle (wife "Sucky" Battle) **freedman**BattleKempP1866_EdgecombeCoNC_CohabitationCertificate

Allen Battle **b. 1808** (farm manager) **freedman**1870_WalnutCreekTshp-Tarborough-EdgecombeCoNC_1870-US-Census

EDG Goal

Enslaved Description Group

Getting Started Message in December 2020 from Daniel

Starting point and focus ----

- **formulating name entries (1)** for the enslaved that will facilitate research
- devise and relate this to **full description of the enslaved**, and to **description of entities (things) (2) related to the enslaved**.

Describing related entities will be essential because:

- **know the enslaved largely through the records of those that enslaved them**
- name entries will necessarily employ elements that are directly based on
 - **names of the related entities**
 - **records that provide the evidence of an enslaved identity and life**

Currently formulation of personal name entries in SNAC is based on

- library standard Resource Description and Access (**RDA**)
- components or parts of name entries are based on **UniMarc** (UniMarc explicitly recognizes surnames, whereas surnames are only syntactically implied in MARC21)

Neither RDA nor UniMarc are sufficient for formulating the names of the enslaved

- Necessary to focus on how to supplement both to accommodate enslaved name entries

Formulating name entries based on components of slaveryCode

slaveryCode Components

| | | | | | | | | | | | | |
|-------------------------|------------------------|----------------|----------------------------------|------------------------------------------------------------------------|-------------------------------------------------------------------------|------------------------------------------|----------------|-----------------------------------------------------------------------------|-------------------------------------------------|----------|-----------------|----------------|
| person first name | person last name | exist Dates | descriptive name or detail | code: enslaved free enslaved-free free-enslaved unknown | owner(s) last name [or person in control or primary CPF] | owner(s) first and middle names | record date | new owner(s) last name [or person in control or primary CPF] | new owner(s) first and middle names | location | new location | record type |

2

Daniel thinking out loud – February 2021 - Formulating name entries based on slaveryCode:

“If the enslaved person . . . has a **sparse name**, that is, consists of a single name component (or perhaps two **when the found reference to the enslaved is an epithet**), then ...

1.“The record in which the reference is found does not represent documentation of a transfer of custody (ownership, loan, lease . . .), then form the name entry using as many of the following as possible, and in the order presented:

- 1.Surname [SNAC]
- 2.Forename [SNAC]
- 3.**Name addition** [SNAC] **use for epithets**
- 4.Owner name entry [or name entry of controlling entity][new]
- 5.Location
- 6.Record type [that is, the type of archival record providing evidence] [new]
- 7.Record date [that is, the date of the archival record providing evidence] [new]

2.The record in which the reference is found represents documentation of a transfer of custody, then form the name entry using as many of the following as possible and in the order presented:

- 1.Surname [SNAC]
- 2.Forename [SNAC]
- 3.**Name addition** [SNAC] **use for epithets**
- 4.**Repeat** the following for each party in the transaction:
 - 5.Owner name entry [or name entry of controlling entity][new]
 - 6.Location
 - 7.Record type [that is, the type of archival record providing evidence] [new]
 - 8.Record date [that is, the date of the archival record providing evidence] [new]

Daniel thinking out loud – August 2021:

A future concept category “Event type” may be how slaveryCode concepts will be further addressed . . . food for thought!

Glossary: **epithet** (Merriam Webster): **a characterizing [descriptive] word or phrase accompanying or occurring in place of** the name of a person or thing

Bernetiae: We need to recognize that sometimes **the occupation, relationship (wife, husband, child, work partnership, etc.), physical characteristics, etc. can form the necessary distinguishing factor** for an individual . . . **then we may need to use these in the epithets.**

Daniel's questions:

Would we relate a person to an **occupation** term and then also put the term in a name? And if so, why?

Bernetiae: Yes. Example: The distinguishing name addition uses an epithet "Blacksmith Lewis" or Lewis ("Blacksmith Lewis")

Daniel's questions:

Why would we include the name of the wife, husband, child or work partner in the name when we can easily display the relations as we do now under **Relationships**?

has descendant

has ancestor

has child

has parent

has family association with

has sibling

has or had spouse

is or was owner of

has or had owner

has or had work relation with

Bernetiae's answer:

Know all men by these presents that I Thomas Jefferson of Albemarle county in Virginia in consideration of the affection I bear to Thomas Mann Randolph the younger and Martha Randolph my daughter, and of the sum of five shillings to me in hand paid, have given and conveyed unto the said Thomas Mann and Martha in full and absolute property the following slaves, to wit, Suck and Philip Evans her child, Scillar and her children Suck, John, Dick and George, and Molly the daughter of Mary, to have the said slaves to their own proper use. in witness whereof I have hereto set my hand and seal and made delivery of the said slaves this sixth day of November one thousand seven hundred & ninety.

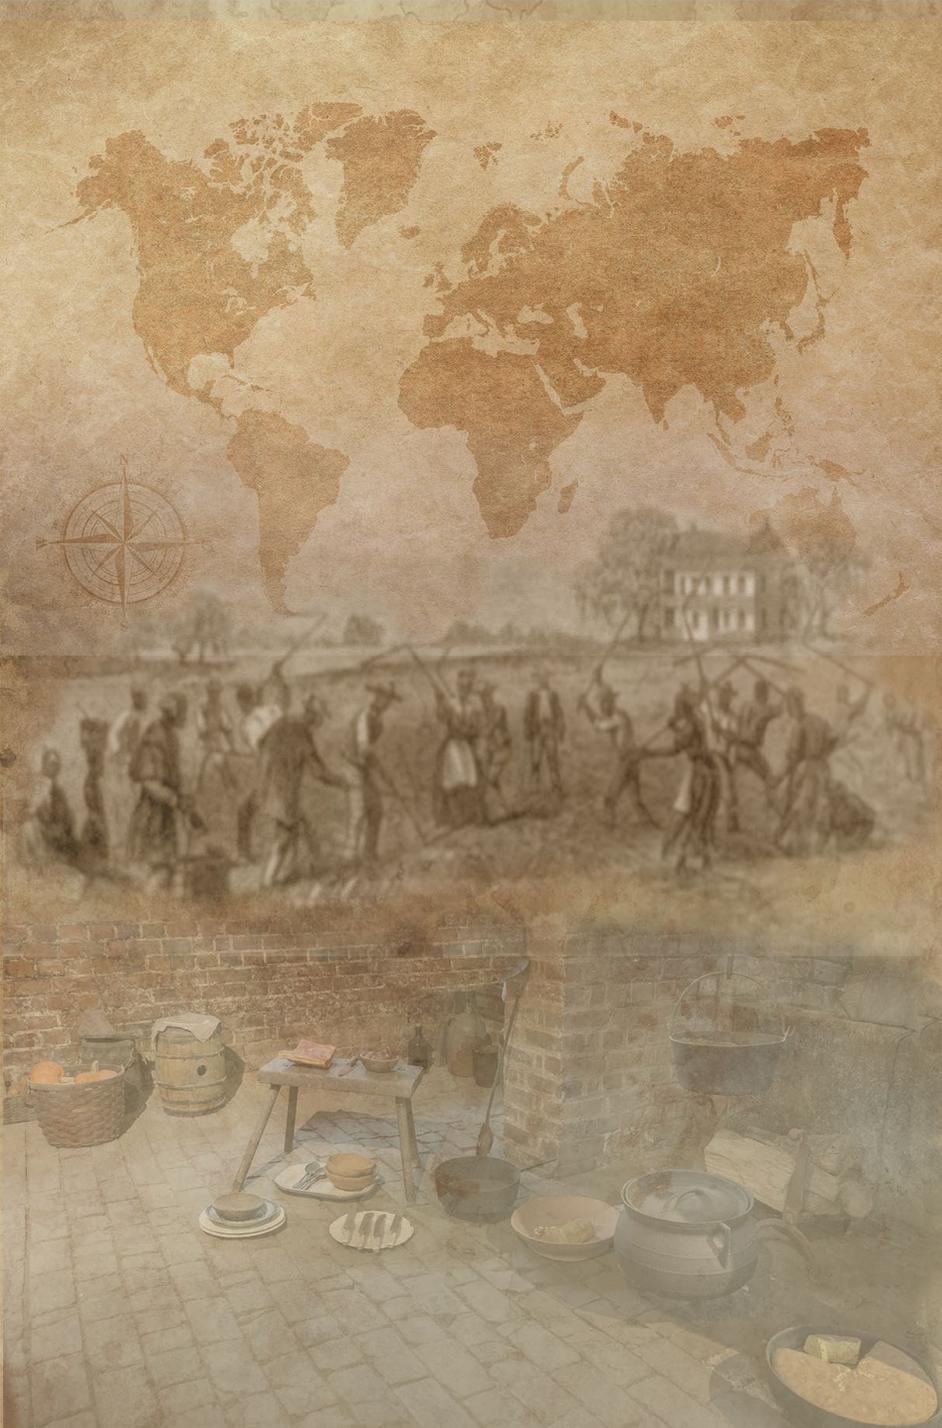

Signed, sealed and delivered in presence of
Nicholas Lewis
J. Jefferson.

Suck (mother of Philip Evans)

Suck (child of Scillar)

Relationships are all we have to distinguish these Suck-named individuals in this transaction

Therefore, **name additions (epithets)** are necessary

Conceptual Category Types – selected focus:

Douglass, Frederick, 1818-1895 Variant names

Detailed View Revision History Sources Export Edit Reserve for Editing

Hide Profile

Biography Resources Relationships Places Subjects Occupations Activities

Frederick Augustus Washington Bailey was born into slavery on the Eastern Shore of Maryland in 1818. He barely knew his mother, who lived on a different plantation and died when he was a young child and never discovered the identity of his father. When he turned eight years old, his slaveowner hired him out to work as a body servant in Baltimore. At an early age, Frederick realized there was a connection between literacy and freedom. Not allowed to attend school, he taught himself to read and write in the streets of Baltimore.

When Frederick was fifteen, his slaveowner sent him back to the Eastern Shore to labor as a fieldhand. Frederick rebelled intensely. He educated other slaves, physically fought back against his owner, and made an unsuccessful escape. Frustrated, his slaveowner returned him to Baltimore. In less than 24 hours, Frederick arrived in New York City and successfully escaped from slavery.

On September 3, 1838, he disguised himself as a sailor and boarded a ship to New York City. He paid for his ticket. In less than 24 hours, Frederick arrived in New York City and successfully escaped from slavery.

After escaping from slavery, Frederick married Anna. They settled in New York City and adopted the last name "Douglass" and started their family, which would include Rosetta, Lewis, Frederick, Charles, and Annie. After finding employment as an abolitionist, he spoke about his experiences in slavery. He served as an agent for the Massachusetts Anti-Slavery Society. The job took him to the Midwest.

After relocating to Rochester, New York, Douglass became involved in the women's rights movement. He bought a printing press and published the Liberator, an abolitionist newspaper.

Frederick Douglass worked with the 54th Massachusetts Volunteer Infantry during the American Civil War. He was promoted to the rank of sergeant-major, a position of honor for a Black man at that time.

In 1872, the Douglasses moved to Washington, D.C. Douglass started to hold various positions in the legislative council members.

SNAC
Conceptual
Category
Types

“first is that there is SNAC as it is right now, and then there is SNAC in the future.”
Daniel Pitti 2021

Let's look more closely at the record for Frederick Douglass

What is missing????

With new conceptual category types – we need to revisit biographies and include enslavement description

Douglass, born into slavery in 1818 on Maryland’s Eastern Shore, wasn’t always owned by the **Auld family**. After living with an aunt and his grandmother, he was sent to serve at the **Wye Plantation** in **Talbot County**, Maryland. There, he saw the brutality of slavery on full display. His **owner and overseer, Aaron Anthony**, fed enslaved children from troughs and mercilessly whipped slaves who did not obey his orders quickly enough.

When Frederick was about 10, he was given to **Anthony’s daughter, Lucretia Auld**. She and her husband **Thomas [Auld]** sent Douglass to **serve** his brother, **Hugh [Auld]**, in Baltimore, where he learned to read while **working in his owner's house**. In 1833, after Thomas and Hugh got in a dispute, Thomas took back the enslaved workers. Douglass **returned** to Thomas’s estate the same year and resumed work as a **field hand**.

Present, Future, and Proposed Conceptual Category Types in SNAC – not plural / additions

| Biography | Resource | Relationship | Place | Subject | Occupation | Activity | Slavery Era Demographic Group | Event | Ethnic Group |
|-----------|----------|-------------------------------------|---------------------------------|--------------------------------------------|-------------------------------------|--------------------------------------------|----------------------------------------|-----------------------|---------------------|
| | | ownedBy (Enslaver) (Overseer) | Wye Plantation Talbot Co, MD | Enslavement Education Slave atrocity | Domestic servants Field hands | Domestic service Working in field | Enslaved Freedom seeker Freedman | Transaction Escape | African American |

Occupations for Slavery Era Entities

A decision was made to use more inclusive term **“slavery era”** and not “slave trade” --- applies to enslaved, free, freed, etc. + inclusive of colonial, antebellum, postbellum, etc.

Daniel’s request – February 2021:

Vocabulary management module is being developed in SNAC

- To manage **conceptual category type** – i.e., **subject**, **occupation**, and **activity** (function) terms

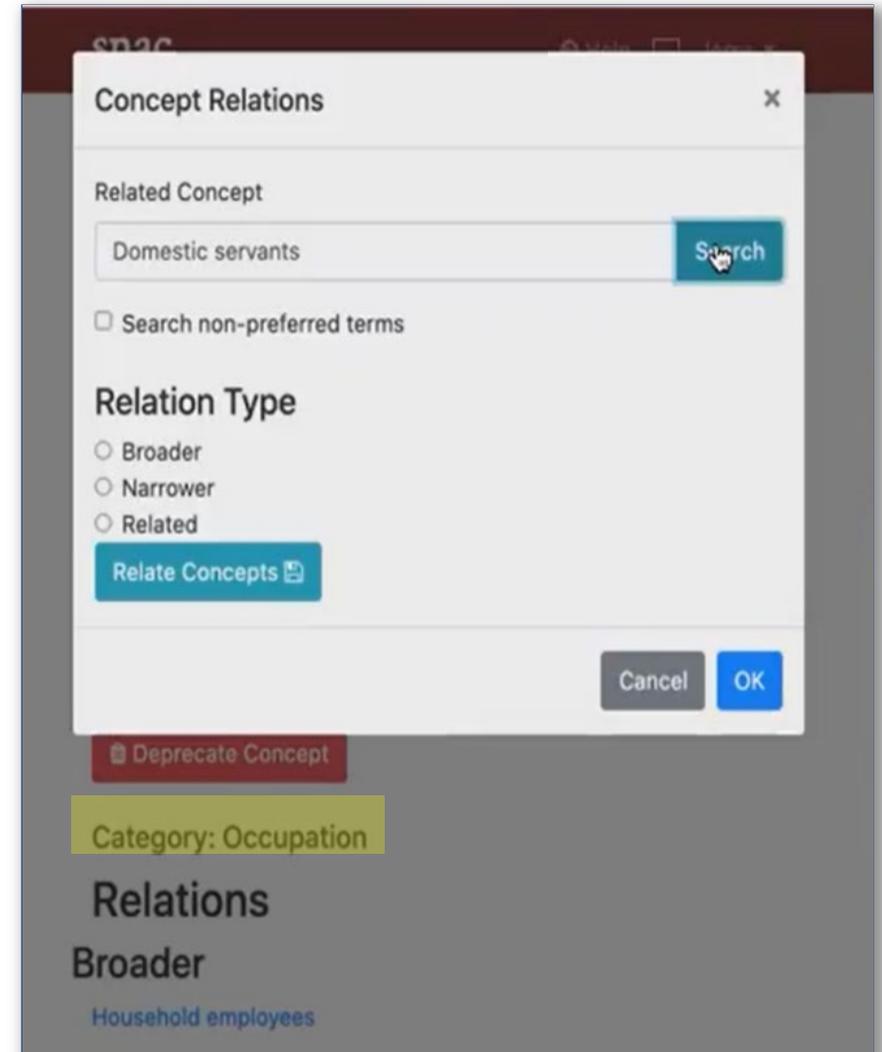

Vocabulary features:

- **Preferred terms** (Multilingual, for example, a preferred English term, preferred Spanish)
- **Alternative terms** (Synonyms)
- **Related terms** (Intellectually related; broader; narrower) (Multilingual)
- **Scope note** (Multilingual)

All the terms are **maintained in one table**, distinguished within by **conceptual category type**: subject, occupation, activity

The vocabulary management module is **being developed**.

Example for “Domestic workers”

Occupation terms - sample

| | | |
|------------------------|-----------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Farriers | | Persons who shoe horses. |
| Fencers (laborers) | | Persons who erect fences to ward off people or animals. |
| Footmen | | Men who, during the slavery era, accompanied carriages either on foot or by standing on exterior carriage boards to announce arrivals. Footmen also served food for meals. |
| Horse breakers | | Persons who work to break in horses. |
| Hunters | | Persons who hunt. |
| Livestock slaughterers | | Persons who slaughter livestock. |
| Milkers | | Persons who milk an animal. |
| Muleteers | | Persons who transports goods using mules. |
| Oxen handlers | | Persons who take care of or handles oxen. |
| Postillions | Postilions, Post boys | Persons who drive post chases or coaches from mounted positions on one of the attached horses. |
| Ranchers | | Persons who own or work on ranchs. |
| Range riders | | Persons who ride on ranges. |
| Ropers | | Persons who use lassos/ropes/lariats to catch animals, possibly in rodeos. |
| Rustlers | | Persons who steal cows, horses, and other livestock from owners on farms, ranchs, or the ranges. |
| Shepherds | Sheep herders | Persons who take care of sheep. |

Authority Record - example

Nannies [preferred] ---- may change with review

UF: Mammies [non-preferred]

UF: Duennas [non-preferred]

UF: Nursemaids [non-preferred]

UF: Nurses (SEE) [non-preferred]

- Slavery Era Occupations
- Domains

Slavery Era Demographic Group

– a new conceptual category type

Ethnic Group

– a proposed conceptual category type

3b

Slavery Era Entity Type or Enslaved Demographic Term vocabulary (now Slavery Era Demographic Group)

Daniel proposed - February 2021

❖ **demographic term list for enslaved and related entities that can be displayed next to the name**
(or even, perhaps, strategically inserted into the name string for display)

❖ **develop an Enslaved Demographic Term vocabulary,**

- using the system described above
- **maintain terms for both enslaved and enslavers.**

- want to **use it in conjunction** with Occupation terms

Example:

a Person is Enslaved and a Carpenter.

- **more than one Enslaved term** can be **associated with the same CPF qualified by a date range**

Example:

a Person may be Enslaved [date range] and then Freed [date range],
as the state of a person in relation to slavery can change over time.

| Demographic group | Variant term |
|-----------------------------------------------|-----------------------------------------|
| Enslaved person | Slave, Captive, Enslaved, Chattel, Hand |
| Emancipated (possibly use instead of "Freed") | Freed, Freedman, Freedwoman |
| Free person | Free person of color |
| Freed | Emancipated |
| Indentured servant | Bond servant |
| Bond servant | Bondsman, Bondswoman |
| "Given own time" enslaved person | |

| | |
|-------------------|--------------------|
| Abolitionist | |
| Anti-abolitionist | Pro-slavery person |

| | |
|-----------------------------------------------------------|------------------------------------|
| Freedom seeker | Runaway, Escapee, Self-emancipated |
| Alternative to freedom facilitator for enslaved person | |
| Enslaved person freedom seeking associated corporate body | |

| | |
|----------------------------------------------------------|---------------------------------|
| Chain gang captive | |
| Chain gangs | |
| Chained, shackled, and/or punitive iron wearing person | Chained person, Shackled person |
| Chaining, shackling, and punitive iron associated person | |
| Coffle person | Coffle slave |
| Coffle | |
| Chained/Coffle person relate corporate body | |

Slavery Era Demographic Group

Review of Conceptual Category Type **scope**

The **list of category types will be extended** as the ESPWG considers and approves **additional types**

Any given concept may occur in **more than one** category type.

| Conceptual Category Type Name | May be used in the description of |
|----------------------------------------------|----------------------------------------------|
| Subject | corporate body, person, or family |
| Occupation | person |
| Activity | corporate body, person, or family |
| Slavery Era Demographic Group | corporate body, person, or family |

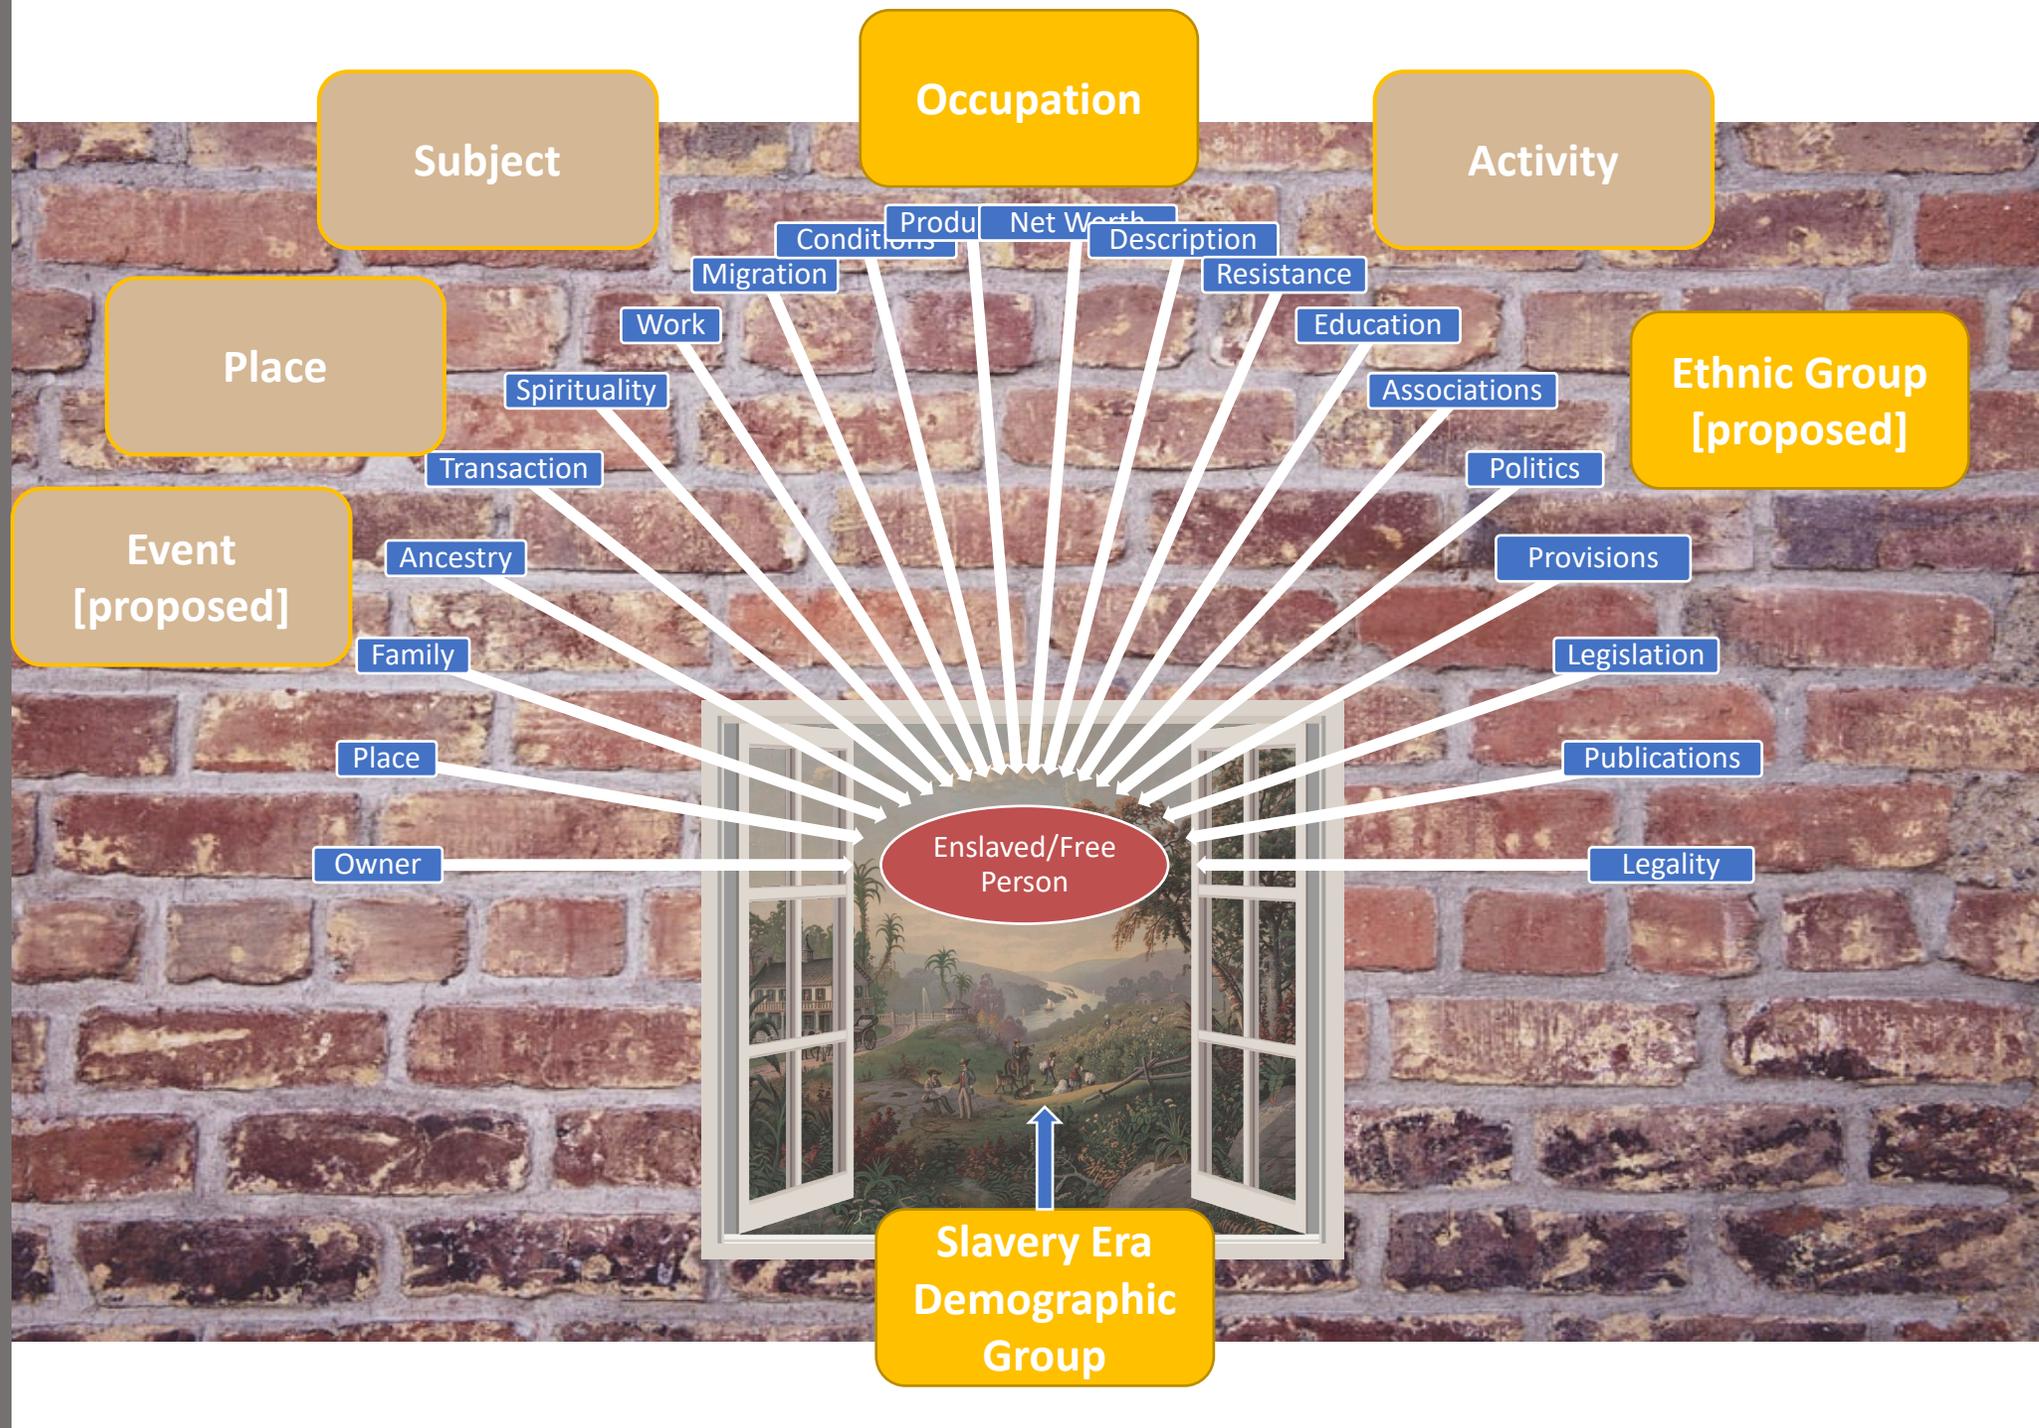

Progress made by the Enslaved Description Group for **slavery era descriptions**

Some of SNAC's Conceptual Category Types:

- Place
- Subject
- Occupation**
- Activity
- Ethnic Group (proposed)**
- Slavery Era Demographic Group (new)**

Daniel thinking out loud – another type in the future: **Event (proposed)** will help in the description of slaveryCode concepts!

Note: The Enslaved Description Group worked closely on the gold-colored categories.

Quick review again:

How does our work address slaveryCode concepts?

Draft of

Editorial Rules for Controlled Vocabularies (Occupations)

(using ANSI/NISO Guidelines for the Construction,
Format, and Management of Monolingual Thesauri)

Formation of a subgroup from the EDG
to work on this:

Laura Hart , Stacey Lavender, and Bernetiae Reed

- Rules for Formulation of Terms
- Ethical Considerations in the Selection of Terms

Daniel – February 2021

“... there is SNAC in the future” in development

Instructed our sub-group to draft controlled vocabulary editorial rules for **Occupation** terms

“... the **vocabulary management module** in SNAC that will give us the **opportunity to manage subject, occupation, and activity (function) terms.**”

The screenshot shows the SNAC web interface. At the top, there is a dark red header with the 'snac' logo on the left and a search bar on the right. Below the header, a light red banner indicates 'This is the development version. Edits ma'. The main content area has a breadcrumb trail 'Concepts / Occupation Terms'. The primary heading is 'Butlers', followed by 'Preferred Term' and the text 'Butlers'. Below this is 'Alternate Terms' with the text 'Manservants'. A blue 'Edit' button is visible. The 'Concept Sources' section contains a URL: 'http://id.loc.gov/authorities/demographicTerms/dg2015060462'. A mouse cursor is positioned over the URL. Below the source are four buttons: 'Edit Source', '+ Add Source', '+ Add Relationship', and 'Deprecate Concept'. At the bottom, the text 'Type' is shown in yellow, and 'Category: Occupation' is shown in black.

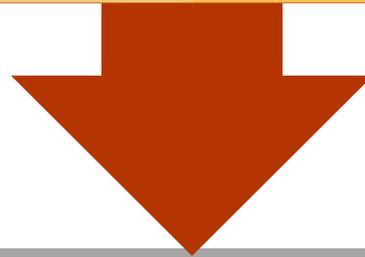

The NEED FOR VOCABULARY CONTROL arises from two basic features of natural language, namely:

Two or more words or terms can be used to represent a single concept (re: **Synonyms**)

- Example: Water carriers/Water boys/Water bearers

Two or more words can have the same spelling and represent different concepts (re: **Qualifiers**)

- Example: Hands (laborers), Fencers (laborers)

Three principal methods of control:

Definition & Scope note – provide scope of use information and/or definitions

Relationship – preferred terms, non-preferred terms (UF, synonyms), BT, NT, RT

Qualifiers – used to distinguish among homographs

May 20, 2021

Breakthrough on where to focus. (Sample later revised)

Jerry Simmons provided the following:

Sample Authority Record for occupations

Field hand [preferred]

UF: Field worker [non-preferred]

UF: Farm hand [non-preferred]

BT: Farm employee

Domain: *Agricultural work*

Field of activity: *Agriculture* [USMARC tag 373]

NT: Cotton field hand

NT: Trash field hand

SRC: Introduction to Jane's Dictionary of old occupations, 1910: (field hand; also referred to as field worker or farm hand) URI: ...

SRC: Sears list of subject headings, c. 1966.

SRC: Department of Transportation thesaurus online, viewed May 6, 2021. URI: [http:](http://)

Glossary entry:

Final focus in

EDITORIAL RULES

for controlled vocabularies:

Term Selection and Relationships:

Preferred term

UF = USED FOR or Variant term

(Non-preferred term, Alternate term)

BT = broader term

NT = narrower term

RT = related term

Scope Note (SN) – definition & clarification

Historical Use Note – historical context / specific explanations / sensitivities addressed

Source Citation

(Note: The role of “Domains” is still being considered.)

The initial editorial rules were intended for the Occupation conceptual category type – however, the application appeared often to be broader

- Use the **modern term** as preferred term when the occupation remains current, use the **older term** as the preferred term when the occupation is not current
- **Gender neutral** terms
- Use **humanize** terms as preferred terms. (e.g., “field workers,” not “field hands”)
- **Pleural** terms (because occupations are demographic groups)
- **Capitalized** first word of occupation term
- Use **qualifiers** for homographs in parenthesis – preferred use of “(persons),” not “(laborers)”
- **Preferred** terms (authority records) -- include **all UF non-preferred terms** related to the term
- **A compound term *should be used***, instead of a single-word term with a parenthetical qualifier
e.g., “harvest workers,” not “harvesters (persons)”

Ethical Considerations in the Selection of Terms

(included in the editorial rules)

1. **Maximum Inclusion**

Examples:

“Kitchen workers,” not “Kitchen women”

2. **Gender-specific terms**

- Use **gender-neutral term** for preferred term, if term **currently exists**
- Use **older gender-specific term**, if term is **currently used** -- e.g., foreman, cowboy
- Use **older gender-specific term**, if an **equivalent** gender-neutral format does not exist
- Use **older gender-specific term with a qualifier**, if the term **does not currently exist**.

3. **Humanizing Terminology**

Examples:

“Field workers,” not “Field hands” as preferred term

4. **Worker Status (Conceptual Category Type: Occupation)**

- Occupation terms must consider the state of employment (paid work) vs non-paid work

Examples:

“Domestic workers,” not “Domestic employee”

5. **Modern vs. Historical Terminology**

- Exceptions to preferred modern term

Introduction to SNAC Controlled Vocabularies

Overview

Controlled Vocabularies are managed or controlled lists of *terms* that represent concepts or particular categories that are used in the descriptive representation of real world things. Controlling such terms serves discovery and, when discovered, the collocation or groupings of descriptions of things that share the characteristic represented by the term. Within the SNAC, controlled vocabularies are used in the description of CPF entities.

SNAC Vocabulary Management

The SNAC vocabulary management system is based on a basic implementation of SKOS ([Knowledge Representation System](#)).

Within each concept category, the vocabulary management system supports the following types of each concept within a category:

- **Preferred term.** For each concept, there must be one preferred term. However, a concept may have multiple preferred terms differentiated by language with the understanding that only one preferred term may be used for any one language.
- **Variant term.** For each concept there may be one or more variant terms for the concept. This is sometimes called a non-preferred term, alternative term, or USE FOR (USE FOR).
- **Associated term.** Associated terms are used to relate or associate one concept with another concept. The following types of related terms are supported, though relationships may be extended as necessary:
 - **Related term.** This is used to relate two concepts *without specifying how the concepts are related*. Most commonly this will relate two concepts that have an intellectual (conceptual) relation of some kind though they are not conceptually related. The relationship indicator for this type of term is RT.

Draft of Controlled Vocabulary Editorial Rules

(Next steps: Review by the Standards and Editorial Policy Group)

Controlled Vocabularies Editorial Rules

A. Term hierarchy and relationships

(SRC: ANSI/NISO Z39.19-2005, 6 Term Choice, Scope, and Form)

Literary warrant provides guidance in the selection of terms and the vocabulary lists will continue to evolve with additions and use.

a. Preferred and Non-Preferred Terms

(SRC: ANSI/NISO Z39.19-2005, 6.6 Selecting the Preferred Form)

- One term in natural language is always the **preferred term** and all other synonyms and sometimes near-synonyms are the **non-preferred terms**.
- **Multilingual preferred terms (multilingual synonyms)** may be included with any term.
- Preferred term selection should be determined after consulting with **literary, user, and organizational warrants**.
- **Abbreviations, Initialisms, and Acronyms** should only be used if well established and if the full form is rarely used.
- **Full forms of terms** are preferred and should be used unless another form is well established.
- **Proper names** may be part or all of a preferred term.

b. Relationships of Terms

- **Synonym (Preferred, Used For, Alternative Term)**
- **Semantic Relationships (Non-Preferred Term, Broader Term [BT], Narrower Term [NT], Related Term [RT])**
