SNAC History 101

Updated February 2022

Welcome to Social Networks and Archival Context!

SNAC demonstrates the separation of the description of corporate bodies (organizations) persons, and families, along with their socio-historical contexts, from the description of the historical resources that are the primary evidence of their lives and work.

Douglass, Frederick, 1818-1895 Variant names

From Frederick Douglass's SNAC record, we can easily discover links to his archival collections, no matter the custodial institution.

A key objective of SNAC is to provide researchers with convenient, integrated access to historical collections held by multiple private and public archives and libraries around the world. This effort also sets the stage for a cooperative program for maintaining information about the people documented in the collections.

Description in SNAC helps resolve the challenge of *archival diaspora* by offering search and discovery through one central system of description.

SNAC History: Research and Development

The vision for SNAC began in its research and development phase in 2010. It depended on the creation of two other standards for use in the archival world that developed in the preceding twenty years: **Encoded Archival Description** (EAD), an encoding standard for machine-readable finding-aids developed in the 1990's, and **Encoded Archival Context-Corporate Bodies, Persons, and Families** (EAC-CPF), a standard for encoding and exchanging authoritative information about the context of archival materials. With the latter's release in March of 2010, the building of linked archival description systems allowing for the separation and independent maintenance of the corporate body, person, and family contextual data from the archival description of records became possible.

Rationale

It was evident that there is a usefulness in developing a resource discovery tool that could ...

- create archival authority records (entity descriptions in SNAC)
- do machine extraction of CPF entities from EAD finding aids
- serve as a linking device for all the collections that referenced such entities

EAD from the John Bigelow Papers finding aid:

Biography Resources Relationships Places Subjects Occupations

John Bigelow, diplomat, journalist, and author, was born on November 25, 1817, at Malden, New York. He was trained as a lawyer and admitted to the New York Bar in 1838. His law practice grew slowly, prompting Bigelow to begin writing for literary magazines and newspapers. This work introduced him to influential politicians and helped him receive an appointment as inspector of Sing Sing Prison, New York. Bigelow's life was punctuated with political appointments. He was Consul-General to Paris during the Civil War and was Minister to France in 1865. He is known for helping Josiah Gregg write his book on pioneer life, *The Commerce of the Prairies*. He died in New York City in 1911.

From the description of Letter, 1887 Dec. 10. (University of New Mexico-Main Campus). WorldCat record id: 47137824

John Bigelow, diplomat, journalist, and author, was born on November 25, 1817, at Malden, New York. He was trained as a lawyer and admitted to the New York Bar in 1838. His law practice grew slowly, prompting Bigelow to begin writing for literary magazines and newspapers. This work introduced him to influential politicians and helped him receive an appointment as inspector of Sing Sing Prison, New York. Bigelow's life was punctuated with political appointments. He was Consul-General to Paris during the Civil War and was Minister to France in 1865. Throughout his life he traveled extensively in Europe and wrote numerous books on political figures in the United States and American history. He is known for helping Josiah Gregg write his book on pioneer life, *The Commerce of the Prairies*. He died in New York City in 1911.

Wangari Muta Maathai was a renowned Kenyan social, environmental, and political activist and the first African woman to win the Nobel Prize in 2004. Maathai was born on April 1, 1940 in the village of Ihithe in the central highlands of the colony of Kenya. Her family was Kikuyu, the most populous ethnic group in Kenya. Maathai became one of some 300 Kenyans selected to study in the United States in September 1960 and earned a Bachelor's Degree in the United States at Mount St. Scholastica (Benedictine College), and a Master's Degree at the University of Pittsburgh. She returned to Kenya to finish her studies, eventually teaching at the University of Nairobi and earned her PhD in veterinary anatomy there in 1971; she was the first Eastern African woman to receive a PhD.

In 1977 Maathai founded the Green Belt Movement, an environmental non-governmental organization focused on the planting of trees, environmental conservation, and women's rights. Maathai was an elected member of Parliament and served as assistant minister for Environment and Natural resources in the government of President Mwai Kibaki between January 2003 and November 2005. In 2004 she was awarded the Nobel Peace Prize for her contribution to sustainable development, democracy and peace, becoming the first African woman to win the award. She died September 25, 2011.

Eleanor Roosevelt (October 11, 1884 - November 7, 1962), wife of President Franklin D. Roosevelt, was an especially active and visible First Lady who, it was claimed, did more to popularize the Roosevelt administration than any other person or factor. Her innumerable trips across the country and visits to workers and their families did much to promote her as one of the people, a democrat with a small "d." She was the first president's wife to hold White House press conferences, and millions of people read her syndicated column, "My Day," and listened to her fifteen-minute radio broadcasts. She was deeply committed to social service projects, particularly those ushered in by her husband's New Deal program, including the National Youth Administration, slum clearance, nursery schools, and playgrounds. During World War II, she traveled to Great Britain, Australia, the South Pacific, and army camps in the United States, boosting the morale and good will of the Allies and American servicemen. Her almost constant public exposure, however, left her vulnerable to criticism, and she was often the butt of "Eleanor" jokes in cartoons, the press, and on radio. She was especially criticized for her sponsorship of the American Youth Congress and her membership in the American Newspaper Guild: both, her critics charged, were dominated by Communists, but she steadfastly refused to end her association with those groups. After her husband's death in 1945, Eleanor Roosevelt was appointed by President Truman to the U.S. delegation to the United Nations. She was also elected chairman of the Commission on Human Rights. By 1949, she was being called the "First Lady of the World" and "Number One World Citizen." A Woman's Home Companion poll showed that she was the most popular living American of either sex, and in 1948, the American Institute of Public Opinion revealed that she was the "most admired woman living today in any part of the world." She was the recipient of numerous awards, including the first annual Franklin Delano Roosevelt Brotherhood Award in 1946, the Four Freedoms award, and the highest honor award of the National Society for Crippled Children and Adults. In addition to her syndicated column, she was a contributor of numerous articles to magazines and the author of several books, including It's Up to Women, The Moral Basis of Democracy, and On My Own.
